i am even considering moving to a place that could provided that more often after we spent 1 month in maui and i never felt so good..

'm for me, the evidence used in the company's promotional material and research is not really the issue and would not grab my attention

and also will it stay in my urine longer if i shoot it compared to snorting it?

and exhaling, fire breathing is a bit of a misnomer in that it's not meant to describe the actual
